

# CARBON TAX

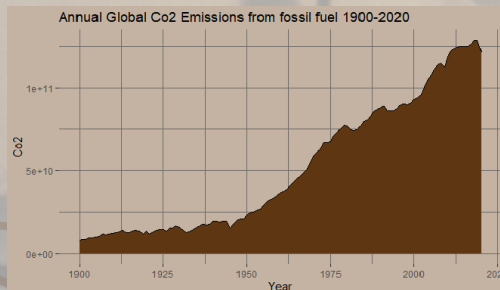

HOW IT DECREASES CARBON EMISSIONS  
AND SUPPORTS ECONOMIC GROWTH

## Where Does Our Electricity Come From?

Fossil fuel has been the world's primary source of electricity.

## The Problem with Fossil Fuel

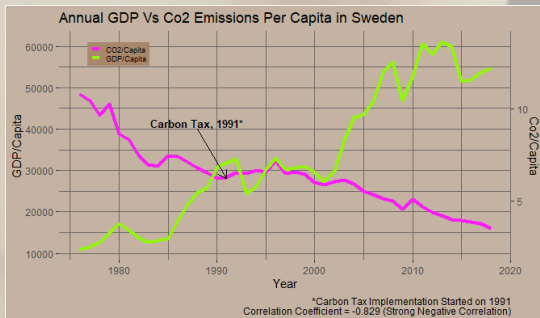

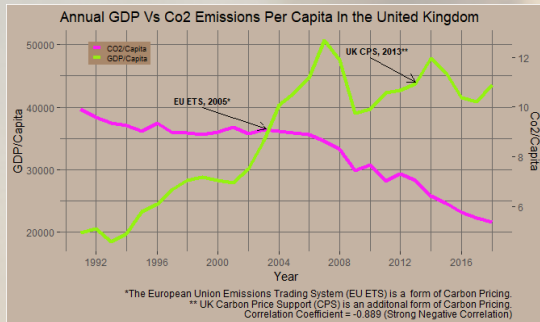

Fossil fuel emits an alarming amount of Carbon Dioxide which causes global warming.

A carbon tax is a **tax** levied on the carbon emissions required to produce goods and services.

### How Effective Is Carbon Pricing?

Let's take a look at The United Kingdom and Sweden

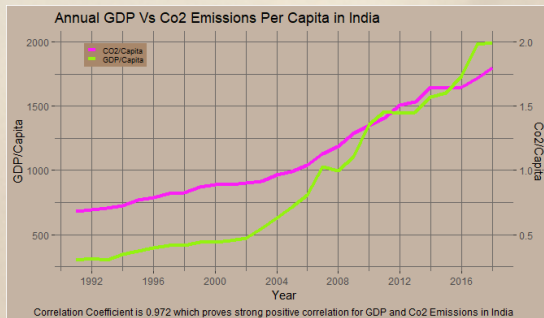

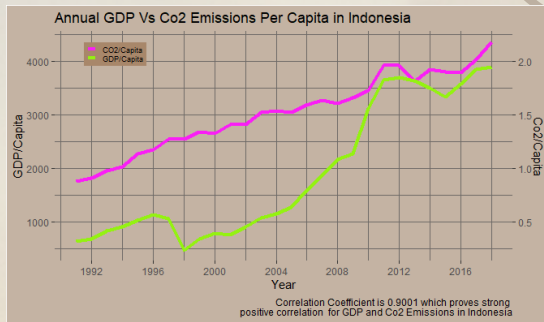

After The Implementation of **Carbon Tax**, United Kingdom and Sweden Experienced The **Increase of Economic Activity** and **Decrease of Carbon Emissions**

## SUMMARY

Putting a Price Tag on Carbon **Reduces Carbon Emission** and **Supports Economic Growth**

**40 & 20** Have Implemented Carbon Tax  
**COUNTRIES CITIES**

Meanwhile, Indonesians and Indians Do Not Pay Any Price For Their Carbon Emissions Yet...

In Contrast to Countries that Implement **Carbon Tax**, India and Indonesia **Carbon Emissions** is in an **Increasing Trend**
